

I have been helped deaf persons, who want to have their vp100. At first I explain them how to take I call any (qwest or comcast or others) for them. Then I call installer to go over their houses. I want to see them, have more than happy. But two ladies told me that their area, whose do not have comcast or qwest or other's at their areas, really sad. I need more feedback from you. Thanks
